

Bug-Juice Paint Additive - Fact Sheet

What is Bug-Juice?

Bug-Juice is an insecticide paint additive that is designed to kill flying and crawling insects that alight on most interior and all exterior surfaces.

Where can Bug-Juice be applied?

Bug-Juice can be applied on most interior and exterior surfaces, including kitchens and pantries.

Does Bug-Juice Repel Bugs?

Bug-Juice does not repel insects, it is a contact pesticide. It begins to work after an insect makes contact with the treated surface.

What kind of bugs does it kill?

Bug-Juice kills crawling and flying insects ranging from ants to mosquitoes and cockroaches to silverfish and weevil.

Will it affect the appearance of the finish?

Bug-Juice will not effect the color or drying time of the coating.

What maintenance is involved?

It is recommended that you hose off the treated surface with water twice a year. This provides a clean surface for insects to land on.

Does Bug-Juice have an odor?

No.

What type of coating can Bug-Juice be mixed with?

Bug-Juice can be added to any oil or latex-based paint, stain, or sealant.
